[Symphony Environmental](#) sees surge in demand for anti-microbial tech

Symphony Environmental PLC ([LON:SYM](#)) has been rated top for its “Super Plastics” campaign in the latest edition of trade magazine Bioplastics News.

The AIM-listed group finished above giant chemical groups such as BASF, Dupont and Stora Enso in the rankings for April.

Symphony also gained recognition for the approval from the US FDA for its d2p antimicrobial food packaging in February.

The group recently released a video to highlight how its [d2w biodegradable plastic technology](#) works.
