## **SYMPHONY ENVIRONMENTAL TECHNOLOGIES PLC**

### **Trading Update**

Symphony Environmental Technologies plc ("Symphony" or "the Group"), the degradable plastics and waste-to-energy Group, announces that it had finished the year 2008 making good progress in all areas. Revenues are expected to show £5.3 million for the year with trading results in line with expectations. Subject to audit and year end considerations, the trading results could show an improved position from that anticipated.

#### **Further information on the Symphony Environmental Technologies Group of companies:**

SYMPHONY ENVIRONMENTAL TECHNOLOGIES PLC is a world leader in oxo-biodegradable eco-compatible plastic technology. The technology is recognised by the **d<sub>2</sub>w<sup>®</sup>** droplet logo on many thousands of tonnes of plastic products.

Symphony has a diverse and growing customer base and has established itself successfully as an international business. Its **d<sub>2</sub>w<sup>®</sup>** products can be found in more than 50 countries around the world and in many different product applications. Symphony is proud to be a member of the Oxo-biodegradable Plastics Association ([www.biodeg.org](http://www.biodeg.org)).

Symphony is also developing innovative waste-to-energy technology and cost-effective processes to convert plastics, tyres and other waste-streams into valuable products.

Further information on the Symphony Group can be found at [www.degradable.net](http://www.degradable.net)
