

28 May 2010

SYMPHONY ENVIRONMENTAL TECHNOLOGIES PLC

Results of AGM

The Board of Symphony Environmental Technologies plc (%Symphony+or the %Company+) is pleased to announce that at the Annual General Meeting of the Company held at 6 Elstree Gate, Elstree Way, Borehamwood, Hertfordshire WD6 1JD on 28 May 2010 at 10.00 am all resolutions proposed in the notice of the meeting were passed.

As a result, and subject only to the confirmation of the High Court, the proposed restructure of the Company's balance sheet and the balance sheets of a number of the Company's subsidiaries by way of intra-group debt waivers and capital reduction schemes in the manner announced on 29 April 2010 will now be carried out by the Company. It is anticipated that this will be completed on 30 June 2010.

The Board of the Company is also pleased to announce that the Companyos current trading is in line with their expectations.

Further information on the Symphony Environmental Technologies Group of companies:

SYMPHONY ENVIRONMENTAL TECHNOLOGIES PLC considers itself a world leader in Controlled-life plastic technology and products - a system that works by a process called oxo-biodegradation. The technology is branded $d_2w^{@}$ and appears as a droplet logo on many thousands of tonnes of plastic packaging and other plastic products.

Symphony has a diverse and growing customer-base and has established itself successfully as an international business. Products made with d₂w plastic technology can now be found in more than 90 countries around the world and in many different product applications. Symphony is a member of the Oxo-biodegradable Plastics Association (www.biodeg.org), the Society for the Chemical Industry (UK), and the American Standards Organisation (ASTM). Symphony is also a member of the

European Organisation for Packaging & the Environment (Europen), the US Save the Plastic Bag Coalition and the British Brands Group. Symphony actively participates in the work of the British Standards Institute (BSI) and the European Standards Organisation (CEN).

Symphony also owns the trademark d_2p for an anti-microbial technology that is used in most type of plastic product applications to help protect those products against bacteria and fungal growth. Symphony is also developing innovative and cost-effective waste-to-value technology to convert plastics, tyres and other waste-streams into valuable products.

Further information on the Symphony Group can be found at www.d2w.net.
