### **Further information on Symphony Plastic Technologies plc**

Symphony develops and supplies environmentally responsible plastic packaging products and additives, which are distributed primarily to the retail, local authority and health related sectors. The Group's main technology, **d2w**<sup>®</sup>, allows plastic to degrade, leaving only water, a minimal amount of carbon dioxide and trace amounts of non-toxic biomass over a short time period. The **d2w**<sup>®</sup> product range now includes additives, carrier bags, refuse sacks, mailing wrap, stretch film, and packaging films.

Symphony has a strong blue-chip customer base in the UK and has successfully established itself as an international business after signing distribution agreements with companies in Brazil, Canada & USA, New Zealand, South Africa, the Caribbean, Saudi Arabia, Colombia and Qatar. Further information on Symphony can be found at [www.symphonyplastics.com](http://www.symphonyplastics.com).
