

Anti-insect Technology for the protection of irrigation pipes

Many farmers depend on irrigation pipes/drip tape to manage the feeding and watering of crops. However, these lifelines are under constant attack from insects.

d₂p Anti-insect Technology

Irrigation pipes which repel insects

Characteristics | Masterbatch Series 911XX

 Composition Anti-insect finely dispersed in a polymeric matrix	 Applications Rigid or flexible plastic Irrigation Pipes and Drip Tapes	 Storage Indoor, away from excessive heat and direct UV exposure
 Masterbatch Colour Oil-white pellets (depending on formulation)	 Addition Rate For most applications 2 - 3% by weight Odour	 Stability Stable in air (non-volatile), stable in UV light & elevated temperatures, and very low solubility in water
 Mode of Action Non-systemic with contact and ingestion. Sodium channel modulator	 Odour Odourless	

A highly active broad spectrum Anti-insect Technology, supplied as a plastic Masterbatch for protecting irrigation pipes against damage caused by insects who puncture the pipes.

d₂p anti-insect technology can protect the pipes from a wide range of insects including thrips, crickets, wireworms and numerous other insect pests. Preventing damage to these pipes will save wastage of water as well as time and money spent on repairs and replacements.

Applications Irrigation pipes: Drip lines, drip tapes, flexible irrigation pipes and sub-soil drip irrigation pipes.
