## **SYMPHONY ENVIRONMENTAL TECHNOLOGIES PLC**

("Symphony", the "Company" or the "Group")

### **FURTHER MIDDLE EAST UPDATE Strategic MoU Signed with Arsan Global**

Symphony Environmental Technologies Plc (AIM:SYM), global specialists in technologies that make plastic and rubber products "smarter, safer and sustainable", is delighted to announce a landmark Memorandum of Understanding ("MoU") with Arsan Global ("Arsan"), a prominent Saudi based diversified business group.

Under the terms of the MoU, Arsan will act as a strategic advisor to Symphony's senior management on business development strategy and will support the expansion of Symphony's business network globally, with a particular focus on Saudi Arabia, Egypt, Indonesia, Malaysia, Morocco, Poland, and Vietnam. Arsan will also assist Symphony in sales, marketing, and distribution of its products, as well as in raising corporate finance.

Symphony may also consider granting Arsan a written distribution agreement for certain markets or product types, such as insecticides for crop growing.

The MoU is valid for one year and may be extended by mutual agreement. It is not legally binding except for provisions relating to confidentiality, compliance, public statements, and other standard terms.

Arsan Global operates across several sectors, including logistics, trading, real estate, and business consultancy, and has established a strong presence in the Middle East and internationally. The company is recognised for its expertise in facilitating business growth and providing strategic advisory services to partners seeking to expand into new markets.

Both parties look forward to a productive collaboration under this MoU.

- **Real Estate:** Property development projects (Core Dimensions)
- **Construction & Furnishing:** Interior design, contracting, and furnishing (via FurnishIQ)
- **Maritime Trading:** Vessel brokerage services (Neom Shipping)

### About Symphony Environmental

Symphony's d2w masterbatch technology is added to polyethylene (PE) and polypropylene (PP) products at the manufacturing stage at little or no extra cost, and ensures that if they get into the environment at the end of their useful life they will not create microplastics and lie or float around for decades. Instead they will safely biodegrade, leaving no microplastics or toxicity. If they get collected during their useful life they can be recycled with ordinary PE and PP without separation See <https://www.biodeg.org/subjects-of-interest/recycling-2/>

Symphony also supplies a range of plastic technologies under its d2p (designed to protect) brand [www.d2p.net](http://www.d2p.net) to provide protection against insects, viruses, bacteria, fungi, rodents, odours, and fire. It has also introduced a new product under its NbR brand <https://www.symphonyenvironmental.com/natural-biodegradable-resin/> to reduce the amount of fossil-derived material in plastic products.

Symphony has a diverse and growing customer-base and has established itself as an international business with over 70 distributors around the world. Products made with Symphony's plastic technologies are now available in nearly 100 countries and in many different product applications. Symphony itself is certified according to ISO9001 and ISO14001.

Symphony actively participates in the Committee work of the British Standards Institute (BSI), the American Standards Organisation (ASTM), the European Standards Organisation (CEN), and the International Standards Organisation (ISO).
